

Student Name _____

Grade _____

Career and Technology Activities

To be enrolled in any of the enrichment activities a student must be performing at a passing level on all CBAs and Benchmarks as well as on report card grades. If not, the student must be enrolled in tutorials and successfully progressing toward academic goals.

The activities below are designed to introduce you to career classes available to you in High School.

CIRCLE THREE

Junior Agriculture - You will learn principles of agriculture, small animal management, agriculture facilities design and construction among other topics as well.

Junior Architecture and Construction This activity will cover topics such as home maintenance and repair, small engine repair, bicycle repair, and simple construction projects.

Broadcast Journalism – News from around the Junior High and the district will be researched and reported on in a newscast similar to the TV news.

Yearbook – This activity provides time for students to create the PJHS yearbook.

Cosmetology – You will learn the knowledge and skills required to work with and style hair.

Culinary Arts – You will learn the knowledge and skills required to prepare great tasting meals.

Health Services – If you have the desire to work in the medical field such as nursing, a doctor, a science teacher, a paramedic, an EMT or even a veterinarian, this activity is for you.

Robotics – Computer programming, materials, and creative thinking all put together makes a robot. Create a robot in this activity with a group of students and compete with other groups!

Digital Beats – Learn the skills, technology, and how write the rhymes to create your own music and perform on stage, or become a DJ.

Enrichment Activities

To be enrolled in any of the enrichment activities a student must be performing at a passing level on all CBAs and Benchmarks as well as on report card grades. If not, the student must be enrolled in tutorials and successfully progressing toward academic goals.

CIRCLE ONE

Imagine Mars – Students will discover what Mars is all about, what it would be like to live there, and travel there. The activity will include skyping to scientists from around the country, various investigative labs, even simple robotics.

Sewing - Create fantastic projects such as pillows, spice up something boring with your own bling, sew on a button, even make your own clothes!

Band – Now that you know how to play your instrument, it is time to have some fun! How about a jazz band or a pep band?

Art – This activity is all about creating with all different kinds of materials.
